Players test their accuracy and puzzle solving skills to help Um Nom a cute green monster with a brutal sweet tooth. The main goal of the game is to quickly get the piece of candy hanging from a rope to drop into the mouth of Um Nom while catching bonus stars scattered on each level. Although it may seem simple it can be challenging as levels progress. Bubbles, more complicated ropes, air gusts, and even some obstacles like electric fields appear. In this rope cut tutorial you will learn how to pass wind through different stages, helpful techniques, and high scoring tips. The cardboard box cut rope tutorial 1-25 has 4 level packs known as cardboard box, cloth box, foil box, and gift box. Each package contains 25 challenging puzzles for players to complete. To clear the levels users need to purchase hanging stars and feed Om Nom the suspended sweets without breaking or losing it. Although for pass it takes only one captured star and this satisfied um nom cut the rope guidance will learn how to control some of the most conflicted levels while catching all the stars. When starting with a cardboard box section just slide your finger across the screen to cut off Multiple hooks with ropes will be attached to candy. Gauge the order in which the ropes should be cut by the position of bonus stars and where the monster is located. Sweets inside bubbles can float upwards to reach high stars. A quick tap will burst the bubble and release the candy. A rope will automatically appear if sweets are directed inside the blue circles dotted around hooks. Spikes appear as a level 1-16 obstacle. The best technique is to cut the rope first and let it swing to the hanging star and then cut the second rope when swinging back to the other side in a row over the second suspended star. Players need to react quickly when the candy is not attached to the rope but it is dropped and carried within bubbles as level 1-19. Cut the rope guidance cloth box 1-25 fabric box section becomes slightly complicated when airbags enter the mixture. These blue bags help blow desired objects and bubbles with candy. At level 2-1 players have to tap the airbag to blow air from below to reach the star in the centre. The airbags were then used to hoist the swinging rope to catch the other two. You may need to tap it several times to get the right movement. Around stage 2-9 pesky spiders invade. Try not to let them steal Um Nom's candy. Cut the rope before they can recede it but make sure it's a planned move. The second to last level 2-24 in the cloth box pack can be tricky. Cut the rope on the right and allow the candy to join in with a left hook underneath it. Cut the top of the rope. Tap the airbag several times for momentum. As it swings towards the right cut the rope launching the opposite hook treat catches the bonus star. Use the nearby airbag to help make the rope go down to Um Nom. Multi-touch features along with moving hooks are also displayed. Adjustable horizontal or vertical hooks can be moved simultaneously with two fingers. There are vertical hooks with a piece of candy attached to both sides using a level 3-11 rope. Players should use both their fingers. I prefer the pointer and the middle finger, but it doesn't matter. Quickly slide the two ropes in the movement up and down to capture the bonus stars. When you're near the bottom slice, the ropes move the candy to Um Nom. The two-finger technique is also necessary for level 3-20. Wait until the electric fields sink and slick two hooks down evenly at the same time. Slide the next pair of hooks down. Cut the top of the rope and cut the lines attached to the last borrowers. Move the last two down from the road and cut across the top of both ropes as the shock waves stop. Don't let half a dozen electric fields scare you level 3-23. Cut the rope and allow the bubble to rise. Then cut the join rope on the right. The bubble floats to the left and catches a bonus star. The bubble while quickly cutting the bottom rope swings the candy into the bubble on the right. The treat should fly to Um Nom immediately. Gift Box 1-25 Tutorial & Cut Off Rope Cheats Level 4-14 Quickly Gift Box Section is essential. Cut the left and then the right side of the rope. Quickly tap the third airbag to move the treat to the next wok. Cut the last rope while tapping the pillows in the center and left to guide it towards the green creature. Finally, level 4-25 cut both sides of the rope. Let it fall and then cut the right following the left allowing the attached bubble to handle the nearby hook float. Tap the airbag three consecutive times to push the candy around capturing bonus stars. Then cut the right rope. Press the airbag again to align the bubble between the spikes and cut the left side. The treat needs to be tied to the wheel. Slide the vw directly over it and turn to float. It will connect to an adjustable hook which can be moved to catch the extra stars. Push to the right and cut the rope. Then make a final slash go down into Um Nom's mouth. Timing and accuracy are everything in this game. It might take a few tries before you control it. Always scan above the screen for potential locaters. Small tuning or lightning speed may be what you're missing. A big cut rope cheat for giving hard-to-reach stars is to slide moving hooks back and forth quickly to make the candy impulse swinging forward. In doubt, use two fingers. To watch instructional videos for all 100 levels check out The Chronicles App, Snork Reviews, and YouTube. References here you can play Slash Rope. Also very popular on this site now are Sugar, Sugar 3, Julie Jong 2, Fireway Solitaire and Roots of Thor.Report game as BrokenCancel reporting of a broken game < El juego comenzará después del video
